## About Me

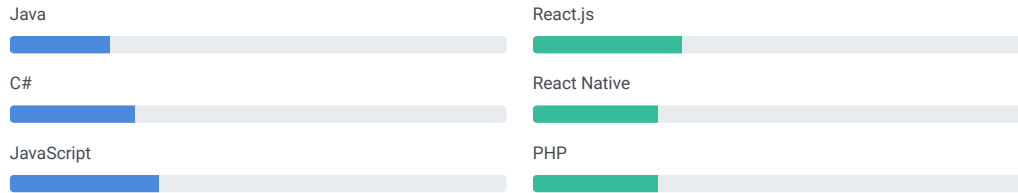

Hello, my name is Diogo Miguel,

I am currently seeking an internship as a Frontend or Mobile Developer. Recently, I finished my school internship at Sevways where I focused on building mobile apps using React Native.

Throughout the course, I have gained basic computer science skills and explored various programming languages such as C, C#, Python, Java, and SQL. I have gained hands-on experience in developing Android apps and Asp.net Core MVC projects. One of my exceptional projects was a highly functional survey platform that was accessible across all platforms.
